

NOBODY GETS TO THE ROOT CAUSE OF FANUC SERVO AMPLIFIER FAILURES BETTER THAN PSI.

Don't let broken components hurt your company's productivity. **PSI Repair Services provides full-system testing, component repairs, and replacements for Fanuc Servo Amplifiers A06B-6096 Series and 6114 Series.** PSI's expertly trained Fanuc technicians use state-of-the-art equipment to diagnose and completely rebuild Fanuc Servo Amplifiers, restoring them back to OEM specifications. Plus, our highly skilled engineers will replace or improve failure-prone parts, including obsolete components, with newer, more reliable technology to improve long-term performance.

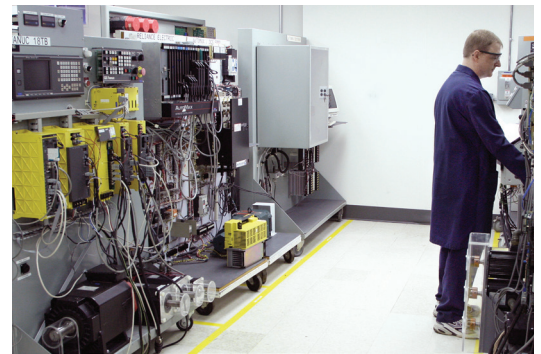

PSI's Three-Step Quality Repair Process:

1. Clean and thoroughly evaluate unit with PSI's extensive array of proprietary test and diagnostic tools.
2. Repair damaged components and replace any stressed or degraded components that could fail in the near future.
3. Perform comprehensive full-system testing to verify that the unit meets or exceeds OEM specifications.

In addition, PSI offers:

- Free evaluation
- Repair warranty
- Emergency repair services
- Engineering services
- Surplus parts services
